Tamil Nadu, India

SUMMARY

AI Engineer seeking full-time roles building production-grade RAG pipelines, FastAPI services, and browser automation systems. Experienced with OpenAI, Groq, Claude, and Gemini APIs, n8n workflows, and Streamlit. Focused on Generative AI, LLM deployment, and intelligent document workflows.

EXPERIENCE

Echo Digital

2026 - Present

AI & Automation Engineer Intern (Early-stage AI Startup)

- Designed and deployed AI automation workflows for document verification, reducing manual processing time by 80% across client verification pipelines.
 - Built production FastAPI services integrating OCR, LLM inference, and structured data extraction for real-world business validation use cases.
-

HIGHLIGHTS

- Built and deployed 5+ production AI systems spanning RAG, Speech AI, OCR, and Browser Automation.
 - Engineered legal RAG pipeline over 34K+ Indian records with multilingual NLP (EN, HI, TA, TE) and PII anonymization.
 - Reduced document verification time by 90% via AI-driven Playwright + OCR automation pipeline.
 - Published open-source AI projects on GitHub with documented setup and active maintenance.
 - QA Intern at Scaler AI Labs — performed exploratory testing and bug reporting on AI-driven platform features.
-

PROJECTS

Udyam Verification API

FastAPI, Playwright, ddddocr, REST API

- Engineered zero-cost CAPTCHA automation using Playwright + ddddocr, eliminating paid OCR dependency.
- Reduced manual verification from ~5 min to under 30 sec via FastAPI REST endpoint returning structured JSON results.
- Live API → udyam-2-bonr.onrender.com

N8N Automated Employee Check-In System

n8n, Google Forms, Google Sheets, Gmail

- Built end-to-end attendance automation using n8n — connecting Google Forms → Sheets → Gmail with zero custom code.
- Live Link → senthilmoni.app.n8n.cloud

AI Resume Analyser

Claude API, FastAPI, Prompt Engineering, REST API

- Built ATS resume analyser using Claude API — scores keyword match, skill gaps, and JD relevance in a single API call.
- Delivers section-level improvement suggestions via FastAPI, returning structured JSON ATS scores for easy integration.
- Live API → resume-anonymizer-t5bb.onrender.com

Real-Time Voice Intelligence System

FastAPI, Groq Whisper Large V3 Turbo, Python, JavaScript

- Built real-time speech-to-text system using Groq Whisper Large V3 Turbo via optimized FastAPI pipeline, supporting live mic streaming, file uploads, session history, and export.

- Source → github.com/SENTHIL-NETXYPER/audio_to_text

NyayaGPT - Legal AI System

RAG, LLMs, LangChain, Vector DB, Multilingual NLP

- Built RAG pipeline over 34K+ Indian legal records using LangChain + FAISS with hybrid dense+keyword retrieval.
- Implemented multilingual NLP (EN, HI, TA, TE) with NER-based PII anonymization for privacy-compliant responses.
- Source → github.com/SENTHIL-NETXYPER

Assignment AI API

Python, FastAPI, LLMs, REST API

- Built a scalable AI Question Generator API with Python, FastAPI, and LLMs.
- Implemented RESTful services, structured JSON outputs, validation, and robust API design.
- Live API → assisgnmet-api-ai.onrender.com

EDUCATION HISTORY

Muthayammal Engineering College

2023 - 2027 CGPA: 7.5

B.Tech in Artificial Intelligence & Data Science

Relevant Coursework: ML, NLP, Data Modelling & BI, AWS Cloud, DBMS, Software Engineering.

TECHNICAL SKILLS

AI & GenAI

Generative AI LLMs RAG LangChain

Prompt Engineering Vector Databases

AI Agents Hugging Face Transformers

ChromaDB / FAISS OpenAI API Groq API

Claude API Gemini API

Backend & APIs

Python FastAPI REST API Design

Pydantic Streamlit

Automation & Tools

Playwright & Browser Automation

OCR & Document Processing

n8n & Workflow Automation

Cloud & Infra

AWS (Cloud Foundations) Docker

Git & GitHub Render (Deployment)

Convex (BaaS)

Data & ML

Machine Learning NLP SQL

Pandas / NumPy

CERTIFICATIONS

RAG with LangChain (DeepLearning.AI) Agentic AI Fundamentals (DeepLearning.AI)

Getting Started with AI (Google) HackIndia 2025 Participant
